

DASHBOARD

Coface Global Solutions (CGS) Dashboard

- The tool that provides you the detailed insight to manage and control your global trade credit risk
- The tool that helps you to focus where it matters most

WHAT IS THE CGS DASHBOARD?

The CGS Dashboard helps you capture the full implication of the trade receivables in your balance sheet. It displays a detailed analysis of your credit risk, it helps recognise trends and provides explanations. In addition to this, it greatly facilitates the management of your credit insurance program while allowing you to check the level of risk transfer and more generally obtain clear visibility over the quality we deliver to each of your subsidiaries.

ADDED VALUE FROM THE CGS DASHBOARD

- Easy access to lists of buyers in order to see the details behind each screen display.
- Historical comparisons with previous months and years.
- The ability to create comparative views (between regions, divisions, subsidiaries).
- Identification of aggregate risk exposures on buyers belonging to the same group.
- Creation of key indicators to support your planning process (e.g. target setting, measurement, control).
- Complete files download.
